## NOTES AND NEWS

## Contributors to This Issue

Brian Diettrich (PhD, University of Hawai'i, Mānoa) is Senior Lecturer in Ethnomusicology at Victoria University of Wellington, New Zealand. Brian's research has focused on Oceania and especially on music in the Federated States of Micronesia (FSM). Among his publications is the co-authored book Music in Pacific Island Cultures: Experiencing Music, Expressing Culture (Oxford University Press, 2011). Brian has chaired the Oceania Study Group of the International Council for Traditional Music since 2015, and he formerly taught music in the FSM at the College of Micronesia.

*David Goodwin* is a Senior Lecturer at Te Kura Kairūri, the School of Surveying at the University of Otago, New Zealand. His research interests include Māori and African land tenure, cadastres, archaeoastronomy and literary cartography.

Judith Huntsman has been an Honorary Professorial Research Fellow in Anthropology at the University of Auckland since her retirement in early 2001. She has been active in retirement, first researching and writing The Future of Tokelau: Decolonising Agendas 1975–2006 (Auckland University Press, 2007), and thereafter publishing articles on aspects of Tokelau life and history. The article herein derives from her Nayacakalou Medal Lecture, presented earlier this year. Her association with the Polynesian Society is long-standing and she was Honorary Editor of the Journal for two decades, a tenure that ended in 2016. Her research focus has been with Tokelau people, in the atolls and in New Zealand, and often in collaboration with the late Antony Hooper; their diverse Tokelau research has always been in relation to the lives and histories of other peoples and places of Polynesia.

Patrick Kirch is Chancellor's Professor Emeritus and Professor of the Graduate School at the University of California, Berkeley. Prof. Kirch, who received his PhD from Yale University (1975), has conducted extensive archaeological fieldwork throughout Melanesia and Polynesia over more than 50 years and published extensively on related topics. His honours include election to the U.S. National Academy of Sciences, the American Academy of Arts and Sciences, the American Philosophical Society and the Australian Academy of the Humanities.

Jillian Swift is a post-doctoral researcher at the Max Planck Institute for the Science of Human History in Jena, Germany. She received her PhD in Anthropology from the University of California, Berkeley in 2016, with a dissertation that applied isotopically-reconstructed Pacific rat diet as a proxy for paleoenvironmental change on several Polynesian islands. Her research pursues novel applications of stable isotope analysis towards understanding the impacts of human-translocated animals on past island societies and ecosystems.
